

Preparing your Learners for Engageli

The following content is a sample student communication that you can send to learners prior to the first session in Engageli to help leverage the platform's engagement capabilities and build a strong classroom community. This can be sent via email or posted directly into the LMS.

Hi class,

Exciting news! This semester we will be using a new learning technology called Engageli. Engageli was built to create a community through social, flexible, and active learning and we are excited to try it out.

Some of the classroom features include:

- Sitting at a virtual table with your classmates, where you can chat, text, and ask questions during the class
- Communicate with me using chat
- Ask questions of the class through the threaded Q&A feature
- Raise your hand virtually during class discussion
- Take notes, including screenshots and annotations. Don't forget to download your notes at the end of class!

To learn more about Engageli and get your devices set up, please watch these two quick videos:

- [Quick start guide](#)
- [Logging in to class](#)
- [Classroom Overview](#)

Engageli has been integrated with our Learning Management System so you should plan to join all classes directly through our modules.

If you have any login or connection issues, please contact Engageli's Live Support by phone at 1-888-979-9597 or by [email or chat](#).

You can also reach support during class by clicking on **Enter help center** in Engageli.
